

Charles Brink is a retired acquisition executive with over 40 years experience in product development and research. He has held key program management assignments in both AF Life Cycle Management Command and the AF Research Laboratory. Of particular interest, Mr. Brink has over twenty years experience managing Hypersonic research efforts to include key program management roles on the X-51 Scramjet Engine Demonstrator program, the joint DARPA/AFRL Hypersonic Airbreathing Weapon Concept (HAWC) program and most recently, AFRL's Hypersonic ISR/Strike Mayhem program.
