

Glenn Richardson
Managing Director, Advanced Manufacturing, Aerospace and Aviation

Glenn Richardson is the Managing Director of Advanced Manufacturing and Aerospace for JobsOhio, the state of Ohio's private economic development company. Glenn's responsible for leading the state's economic development network to help existing Ohio manufacturing and aerospace companies grow, and to attract new companies to the state. Glenn has been with JobsOhio for nine years, nearly since the company's inception in 2011.

Glenn is an experienced operations and engineering leader and has worked in the aerospace, automotive and energy industries. Prior to JobsOhio, he worked for Rolls-Royce Energy Systems, Inc. as Vice President of the Packaging and Driven Equipment Supply Chain Unit. Glenn has also worked for the Dana Corporation as the VP of Off-highway, Americas and with Honeywell, where he led the development of the fuel valves for the jet engine on the F-22 fighter.

Glenn earned his MBA and master's degree in mechanical engineering from the University of Notre Dame and his bachelor's degree in mechanical engineering from Purdue University.
